**SPECIFICATION:**  
 BFPProducts Inc. enclosures are manufactured to ASSE-1060 standards and designed to be used to help protect Backflow Prevention Devices from freezing conditions and vandalism. Factory assembled construction will include a gelcoat shell backed with chop-strand polyresin bonded fiberglass, internally insulated using polyurethane spray-foam.  
 WEIGHT: 14 LBS

**Options:**

- HEAT SOURCE - HEAT TAPE #H30
- T-TURF - Turf installations require elevated discharge drain to facilitate flange bury.

ASSE-1060
